WORKING SPACE REDESIGNED

addo OFFICE FURNITURE CONTRACT
Quality is a must-have value.
Quality is a must-have value.

So is design. And bringing a good design to life while paying the utmost attention to quality is invaluable.

Addo manufactures a wide range of modern office furniture from stand alone desk to complex and interactive modules, and to custom made furniture for hotels and hospitals keeping quality and design always on mind.

addo OFFICE FURNITURE CONTRACT
Ares is the god of war in Greek mythology. Starting point was to design something unique, powerful and unforgettable, which remains in the mind of people. The legs are important details, they are as important as the legs of a warrior horse; strong and always ready to fight.
Ares is the new executive desk system for places where important decisions are made, god of war, stays stable on its legs. Main detail are the legs in cast aluminium, double legs which are giving more stability to the whole structure. Ares with its modern design has different technologically advanced functions, such smart phone charger, lighting, sliding panels... The table with the glass table top turns around the pivot on the sideboard which allows the system to adapt to the existing space.
desk system
We have two independent legs (Same legs but inverted) connected with a beam to make it more stable, the design allows Addo Furniture having their LEG, recognizable as the LEG of Addo.

For the legs we have different options, cast aluminium, wooden legs (wod or leather finishing) and metal legs, laser cut.

The table top is made of different details, an aluminium frame with leather cover, holds the table top in glass with different finishing or a wooden top in different type of wood veneer, leather covering or a lacquered top. One part of the table top is a sliding element where you can put things you don’t want them to leave on the table top.

To complete the executive table we have a side board with different finishing and sizes, from smoked oak, leather and lacquered.

To complete the space, the executive table has high and low cabinets with different options, library, storage, bar wardrobe, place for a display and more. All made of wood with different finishing and materials.

ARES
meeting
NEL
new executive line
NEL is the perfect combination of different materials; solid wood, marble and leather, all materials coming from the nature.
Soft lines and organic forms are completing the design. The result is a very exclusive desk system for exclusive workplaces.

It’s made of different size table top with leather board, legs in solid wood, side table in marble used for meetings, side board with leather top and low cabinet. The sideboard is the central point, the main table top and the meeting table top are positioned around the sideboard and the pivot allows to position the system depending on the form of the space. NEL is a highly flexible system which adapts easily in every ambiance.
“SLIM” can be very elegant, SLIM requires defined lines and SLIM can be very exclusive by using the right materials. We tried to design a new executive working place with an elegant line, with rich materials.
The section is a triangular form which towards the ends becomes SLIM and this gives lightness and the elegance to the table.
BRIDGE executive line
Bridge;
A structure spanning and providing passage over a gap or barrier, such as a river or roadway. Something resembling or analogous to this structure in form or function: a land bridge between the continents; a bridge of understanding between two countries.
BRIDGE manager

A BRIDGE IS NOT ONLY PROVIDING A PASSAGE OVER A GAP OR BARRIER. A BRIDGE CONNECTS PEOPLE, INTERCHANGES KNOWLEDGE, CREATES RELATIONS.
BRIDGE WORK GROUPS
CEO executive line

DESIGN: SEZGIN AKSU (AKSU/SUARDI)
Being designed for the needs of modern office life, CEO gives the clues of its quality in every aspect. Sitting at a CEO desk gives you the feeling of being a captain in a cockpit, everything at hand and under control.
of modern office life...
Addo Furniture opens a new era in offices with the HUB series, which was released with the signature of Sezgin Aksu.
35 HUB W COWORKING
Born from the idea of creating a free design that keeps pace with the rapidly changing perception of design, HUB responds easily to the requirements of a new generation of working culture, allowing for easy change of the leg (Allows to use 3 more options). Providing solutions for individual workplaces, social areas, unit managers and home-offices. HUB can be also organized according to the number of employees in open offices.
With its modules that allows Co-Working understanding, the series that creates a social environment from high desks to whiteboards and cabinets allows integrity in all areas in new generation offices.
39 HUB L
STORAGE SYSTEM
Piuma is a shelving system made of metal tubular profile. We used a reduced (10x10m) section to obtain a very light (Piuma=feather) and strong structure, almost transparent. Different additional pieces can be added to create his library – wooden lacquered open or closed boxes, wooden or metal shelves and volumes made of foam and fabric covering used a acoustic panel. Piuma will be available in different sizes and colors.
“It is my sixth year that I collaborate with Addo, since we started we have come a long way, and Addo has grown in all senses and today Addo is a reality that has conquered its place among the most vanguard companies. It offers a rich collection of high quality office furniture and is always in search of improving and satisfying the needs of its customers”

WING
WORKING SEATS

DESIGN: SEZGIN AKSU (AKSU/SUARDI)
WING high&low

Wing is a multi-use armchair with a very clean and modern design. The Wing holds and protects the person, it is attached to the seating in one point which allows an elasticity and comfort while seated. Wing has a standard version and a version with a shoulder lean, Wing Low and Wing High. Different fabric and leather types and colours can be used, it is as well possible depending on the ambiance of use, to use different materials/colours inside and outside. Wing will be available with different structures, with and without wheels and different finishing.
WING LOUNGE
WING L (Lounge)

Wing L is a lounge chair designed to be used in certain ambiances like executive areas, hotel reception areas, certain waiting areas, airport lounges and more. It comes in 3 different types and with a pouf, depending on the necessity the chair can have low shoulder lean, a higher head lean and bigger piece to allow privacy. Different fabric and leather types and colours can be used, it is as well possible depending on the ambiance of use, to use different materials / colours inside and outside.
Thanks to its catchy shell proposal and repetitive back details, Spina offers an alternative solution to sitting groups that cannot be easily distinguished from their counterparts. It converts into a rich product group based on a blend of details inspired from back and backbone structures, with aesthetic and ergonomic parameters.
With changes in header, armrest, and foot mechanisms, chair solutions can be set as modular units that are diversified with a range of executive chairs, standard work chairs, meeting chairs, or restroom chairs within work chair product groups.
In addition, a material difference was created in the back and sitting parts by using an inner shell-outer shell contrast, so that a seating group was designed that offers a variety based on needs and aesthetic tastes of users.

ATİLLA KUZU.
JULY 2018
When you go to a park to have a walk you will maybe sit on one of the benches you will find everywhere. Usually these benches are spacious and comfortable even if you stay there for a long time. Parco has been designed to satisfy these needs of the user, to allow comfortable seating. The collection has 1-2-3 seater and offer a wide combination of fabrics and leather and of curse colours.
We have beautiful PIAZZAS in Italy, in every city you might find many different PIAZZAS, they have for sure many things in common, PIAZZA, a place where people meet to sit together, to play, to talk, ..., PIAZZA is called as well the new modular seating system is designed to be used everywhere where people are present.

POUFS

It comes from the Italian word dondolare, which means rocking. Imagine a typical meeting with different people, what happens is, people will shake their legs or feet, play with a pencil and more... because people tend to be nervous in these situations. Well we are helping them with a rocking pouf.

Kids love everything that moves so the rocking horse, so the idea is to give the adults their rocking wolve Lupo, the rocking rabbit Roger, the rocking duck Donald and the rocking horse Ciuchino.

Have fun!
Exe is a try to create a combination between the use of leather and fabrics, and it has a rigid external structure made of leather or fabric and a soft interior with soft cushions, a comfort like inside a nest. The structure is raised and so it seems lighter, the family contains 1 + 3 seater and a low table with different finishes.
Fly Wood that stands out with the wood surfaces on sides and back brings a stylish solution to the executive offices with its seating comfort in a modernized classical look and minimal chicness.
Fly Fabric that is a great choice for those looking for both style and ergonomics for their executive offices combines the classic and the modern in the same design with its sharp lines. And it does all these without compromising from comfort.

EXE LOW TABLE
FLY LOW TABLE
A series of low tables with the base in laser-cut metal plate and bended. There are different sizes for the table top and the structure with different finishes and color.
POSE
CAGE
The idea comes from the imagination as a person without great knowledge would have built a structure for a table, with pieces found around the house. We have interpreted it in a modern minimalist version. The result is a very rigid structure and as a consequence we have added different types, such as a dining table, low tables, coffee table.

ALFRED
Ge Giussani manufactures coordinated systems of raised floors and dividing partitions that meet the demands of today's ever-changing working environment. Elegance, functionality, and adaptability are the keywords of the systems. With an experience of more than 40 years in the furniture industry, the Company researches and develops new solutions able to satisfy aesthetical and technological aspects, combining design and quality materials at competitive costs. A series of products enriched by design, from mass production to the custom-made solutions.
Dividing partitions full height, with single or double glazing; wooden walls with melamine, laminate or lacquered finish, or solutions with paneling both glazed and solid. Fitted walls of integrated storage modules.

The versatility of the systems along with the wide range of panels finishes allow for custom-made solutions.
Research, innovation and flexibility
Solutions for any requirements

The boiserie panelling in natural wood and the counter realized on design dress up the space with character.
Modular partition system of reduced bulk, with double glazed panes full height, without vertical mountings. It is characterized by an aluminium profile with a groove that "suspends" the partition, giving the possibility to insert decorative strip-lights or elements in different materials.
Harmonious lines that define the space
H67D with double glass and H67M with single glass are systems that integrate easily also with the architectural projects that propose working areas more and more informal.
Partition with double glass full height. It is available also in the solution with one or three glass panes. The doors composed of double glasses framed with aluminum profiles, guarantee the continuity of the surface with the fixed part of the infill panels.
LIGHT combines the transparency and simplicity of the glass to aluminium profiles and solid panels with results adaptable to any situations.
Luminosity, transparency and linear profiles
This polished and neat partition with single glass can be easily integrated in all the other systems proposed by Ge Giussani.
WORK proposes a wide range of components that creates infinite storage solutions that divide space. It is both a system of dividing partitions and liberal storage modules.

Compact and solid both in appearance and substance, LINE is a versatile partition wall with vertical modules that fit well in any type of setting.
CUSTOM MADE SOLUTIONS

Elements realized on design for highly customized environments.
Works of wood and metal carpentry, drywall, painting, decorations, horizontal tables and supports of various shapes and sizes with metal structures and top panels in varnished wood, painting with various products and colors for the rough vaulted ceilings.
The completely accessible interspace created by the access floor allows for the housing of electrical and hydraulic ducts, cabling and wiring. Panels are laid without permanent fixing and are therefore removable in order to allow access to the various technical plants for maintenance or change, easily replaced without ruining the integrity of the flooring. Thanks to the many finishes available, the panels can satisfy every kind of need both technical and aesthetic, helping to achieve highly customized environments.
SOLIDO

A self-locking floor system that facilitates the self-centering effect of the panels and prevents possible lateral movements.
Single-block floor that consists of two basic elements: panels and supporting structure. The panels are of the same type used for traditional raised floors, chipboard and calcium sulphate. The range of possible finishes is very wide.

The support columns, entirely in galvanized steel, are composed of two elements: the base fixed to the slab and the head. The head is equipped with four pins that are inserted in the lower part of the previously perforated panel; the pins allow you to connect and lock the panels.
